PROFESSIONAL SUMMARY

Full-stack software developer with an engineering background and 9+ years of analytical problem-solving experience. Experienced building and deploying responsive web applications using React, JavaScript, Node.js, Python, REST APIs, SQL, and PostgreSQL. Seeking an early-career software engineering role with a focus on frontend development and opportunities to expand backend expertise.

TECHNICAL SKILLS

Languages: JavaScript, Python, SQL, HTML5, CSS3

Frontend: React, React Router, Context API, Redux

Backend: Node.js, Express, Flask, REST APIs

Databases: PostgreSQL, SQLite

Tools & Platforms: Git, GitHub, Vercel, Render, Stripe, Cloudinary, Resend, Docker

Other: JWT Authentication, API Integration, Responsive Web Design, Web Scraping, Payment Processing

PROJECTS

JT's Vinyl Store - Full-Stack E-Commerce App: <https://jtsvinylstore.vercel.app>

React • Node.js • Express • SQLite • Stripe • JWT • Resend

- Built and deployed a full-stack e-commerce application with authentication, shopping cart, Stripe checkout, persistent order storage, and automated email confirmations.
- Developed REST APIs and React Context-based state management for users, products, orders, cart, and authentication.

Kings Island Coasters - Interactive Web App: <https://kingsislandcoasters.vercel.app>

React • React Router • JSON • Responsive Design

- Built and deployed an interactive web application documenting the history of Kings Island's roller coasters with reusable React components, dynamic routing, timeline views, and detailed coaster pages.
- Structured and maintained large JSON datasets for coasters, manufacturers, park areas, historical events, records, and multimedia content.

Which Beatle Said It? - Full-Stack Trivia App: <https://which-beatle-said-it.vercel.app>

React • Node.js • Express • SQLite • JWT • bcrypt

- Built and deployed a full-stack trivia application featuring user authentication, guest play,

randomized quizzes, and persistent high scores.

- Developed REST APIs for authentication, user management, game logic, and score tracking using JWT authentication and bcrypt password hashing.

Cheap Machines - Responsive Band Website: <https://cheapmachines-music.vercel.app>

React • React Router • Responsive Design • Resend

- Designed and deployed a responsive React website for an independent band featuring music, shows, media, and contact information.
- Built reusable components and a serverless contact form with Resend for email delivery.

Zen Zinnati Music - Streaming Platform w/Merch: <https://zenzinnatimusic.vercel.app>

React • React Router • Cloudinary • Stripe • Resend

- Developed and deployed a responsive music streaming and merchandise platform with dynamic album, track, and product pages powered by structured data.
- Implemented persistent audio playback, Cloudinary media hosting, Stripe-powered checkout, and Resend email notifications.

PROFESSIONAL EXPERIENCE

Land Surveying Technician / Drafter

Surveying and Drafting Services, Inc. — Remote/Hollywood, CA

(February 2016 – April 2025)

- Performed precision-based geometric computations and spatial data analysis translating field data into structured digital models.
- Interpreted technical documentation and regulatory requirements to produce accurate technical maps.

Architectural Drafter / Manager

N.E. Designs Inc. — Sherman Oaks, CA

(November 2014 – November 2015)

- Created technical plans and documentation while applying regulatory requirements to design specifications.

Engineering Intern / Co-op

City of Cincinnati — Cincinnati, OH

(June 2011 – September 2012)

- Assisted with infrastructure drafting, GIS mapping, quantity calculations, and cost estimation.

EDUCATION

University of Cincinnati — Bachelor's Degree

Civil / Environmental Engineering (June 2012)
